

UK / EU Declaration of Conformity

We,

Chevron Distribution Ltd
Unit 1, Watermill Business Centre
Edison Road, Enfield, EN3 7XF
United Kingdom

Declare under our sole responsibility that the product:

Model: Whyte IRS Power Supply Unit
Model names: WPSU-SAP1 and WPSU-SAP2

complies with following Directives and Standards:

Document	Short description	Issued/Version
EN 55022	EN 55022 is a modified derivative of CISPR 22 and applies to, as the name implies, information technology equipment (ITE). Procedures are given for the measurement of the levels of spurious signals generated by the ITE and limits are specified within the standard for protection of radio services in industrial, commercial or residential environments.	2010+AC: 2011
EN 55024	EN 55024 is equivalent to CISPR 24 and applies to, as the name implies, information technology equipment (ITE). EN 55024 defines the immunity test requirements for information technology equipment in relation to continuous and transient conducted and radiated disturbances. Tests within the standard include Electrostatic Discharges (ESD), Electrical Fast Transients (EFT), Surge, Power Frequency Magnetic Fields, Power interruptions, Radio Frequency Interference (RFI).	2010
EN 61000-3-2	EN 61000-3-2:2014 applies to all electrical and electronic equipment that has an input current of up to 16A per phase, suitable for connection to the low-voltage AC public mains distribution network. A public mains low-voltage distribution network exists if more than one independent consumer can draw power from it.	2014
EN 61000-3-3	Electromagnetic compatibility (EMC) - Part 3-3: Limits - Limitation of voltage changes, voltage fluctuations and flicker in public low-voltage supply systems, for equipment with rated current ≤ 16 A per phase and not subject to conditional connection	2013
EN 60950-1	This standard is also applicable to such information technology equipment: - designed for use as telecommunication terminal equipment and TELECOMMUNICATION NETWORK infrastructure equipment, regardless of the source of power; - designed and intended to be connected directly to, or used as infrastructure equipment in, a CABLE DISTRIBUTION SYSTEM, regardless of the source of power.	2006+A11 2009+A1 2010+A12 2011+A2 2013

CE / UKCA was initially applied in 2022
